January 8, 2000

Jane Henney, MD, Commissioner
Food & Drug Administration
5600 Fishers Lane, Rm 1471
Rockville, Md 20857

Dr Henney:

I am concerned about the use of growth promotion antibiotics being used in animals. My concern is that the same antibiotics used to treat human diseases will become less effective. Please take action to see that animal uses of antibiotics is banned or at least limited.

Sincerely,

Kevin M Marek
